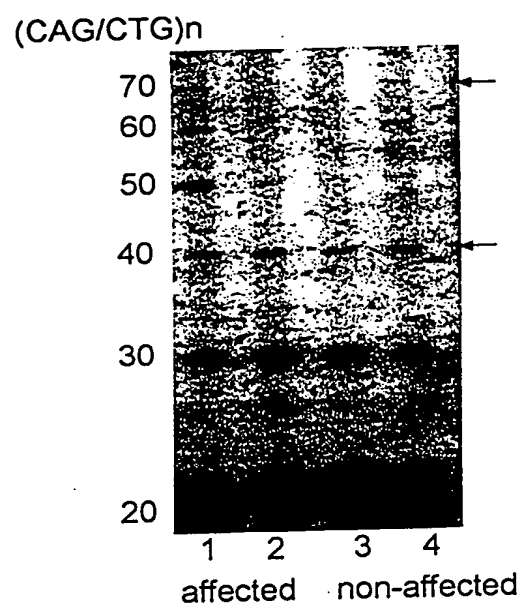

Figure 1

Western blot analysis showing the expression of ataxin-1 and TBP in SCA10 and control (Contr) cells. The blot displays protein bands for ataxin-1 (202K, 133K, 100K) and TBP (38K). The lanes are labeled SCA, Contr, SCA10, and SCA10. Molecular weight markers are indicated on the right: 202K, 133K, 100K, 71K, and 38K. The ataxin-1 bands are present in all lanes, while the TBP band is present in the SCA and Contr lanes but absent in the SCA10 lanes.
